

To create a PowerPoint with Amplify, follow these steps:

1. Navigate to the “assistant” tab, click the “Amplify Helpers” folder and select the “Create PowerPoint” template.

2. Populate the pop-up that appears to provide information on the PowerPoint you would like created, then click “Submit”.

3. Wait for AI's response to finish, then hover over the response and click "Download Response".

The screenshot shows the Vanderbilt AI interface. On the left, there's a sidebar with various AI helpers like 'Summary with Quotations', 'CSV Extractor', and 'Create PowerPoint'. The main content area displays the 'Conclusion' section, which includes 'Key Takeaways' and 'Questions and Discussion'. A red arrow points from the 'Key Takeaways' section towards the download icon in the top right corner. The download icon is part of a vertical toolbar with other icons like copy, paste, and refresh.

4. Within the pop-up, change the "Format" dropdown to "PowerPoint", select your desired template, and click "Download".

The screenshot shows the Vanderbilt AI interface with the 'Conclusion' section visible. A red arrow points from the 'Conclusion' section towards a 'Download' dialog box. This dialog box has 'Options' at the top. Under 'Format', 'PowerPoint' is selected. Under 'Template', 'vanderbilt_1.pptx' is selected. The 'Download' button at the bottom right of the dialog box is also circled in red.

5. A “Preparing Download” pop-up will appear. Wait for this to finish, then select the “Click to Download” button.
